## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of Group I, claims 1-9, in the reply filed on April 15, 2009 is acknowledged. Accordingly, claims 10-19 are withdrawn from consideration as being drawn to a non-elected invention.

### ***Claim Rejections - 35 USC § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-9 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 1-9 are non-statutory as the claims are not tied to a statutory class nor transform the underlying subject matter to a different state or thing. Further, the claims may be practiced by hand, e.g. the process may be broadly viewed as pen, paper and calculations made thereon/therewith. Applicant's recitation of a computer from claim 1, or a memory region from claim 2, does not obviate this line of reasoning.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 3, "of preset unit amount" is not clear as to what is being referenced.

Claim 1, line 4, "the number" and "the balance" each lack antecedent basis and is not clear.

Claim 2, lines 1, 2, "the registering step" lacks antecedent basis and is not clear.

Claim 2, line 5, "of unit amount" is not clear as to what is being referenced.

Claims 3-9 contain improper syntax, e.g. claim 3, lines 2-3, "a unit amount of each digit expressed by n-base notation." As is the claims are not clear as to what is being positively recited. Clarification is required.

### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-9, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Bent et al., US 7,519,551 B2.

Bent discloses accounts, e.g. 501, 503, 505, 507, 509, 511, and transferring funds in each of the accounts corresponding to a balance in the account. Bent does not disclose a "of preset unit amount" for each account, nor the various unit amounts expressed by various digits, e.g. n-base notation. As understood, such has been common knowledge within the accounting art. To have provided such for Bent would have been obvious to one of ordinary skill in the art. The motivation for having provided such would have been to have provided a accurate mechanism to transfer funds to each separate account.
